How Can You Make Money Just By Watching Television?

or,

The Secret of the Obvious

Dear Hypnotic Gold Member:

Most bodybuilders are broke.

I know because over the last two years I've studied them, met them, trained them, and become one of them.

I'm not broke, of course, but many if not most of them are.

But one bodybuilder isn't.

He got an idea for an incredible new service by watching television.

He now works 14 hours *a month* and makes a nice living.

His story is on this month's members-only Hypnotic Gold interview. It's an inspiring story because he reveals that your wealth may be sitting under something that is pretty obvious.

It may even be right on your TV.

In the hypnotic story of this month's guest, he saw wealth in a reality TV show that he adapted for a niche market.

On the interview, he explains such things as –

- reality TV shows as a type of info product
- how to go from zero to having hundreds of customers fast
- how to use niche message boards to build your business
- subscribing to print magazines in that niche
- offline direct marketing tactics that worked in this niche 30 years ago
- how to partner with niche "celebrities" to produce a "reality" info product
- use one successful project to leverage into other projects and business ventures within that niche
- modeling successful concepts in other industries to create new products in your niche
- using video in marketing offline
- how www.mrfiremeltdown.com will benefit people
- how www.bodybuildersreality.com became a hit
- customer service secrets
- doing an inner circle seminar, \$497 for 25 people means instant wealth

This is a fascinating interview.

Why not pop it in and listen to it right now?

And then watch television later and see what “obvious” ideas pop out at you.

Go for it.
